- Lab Update: PM Collection
- Expanded Interventional Radiology Services
- P&T Committee Update
- Patient Choice Awards
- Medical Staff Policy Updates
- Welcome Diego Perilla, COO

ER at Fruitville Opens December 1st

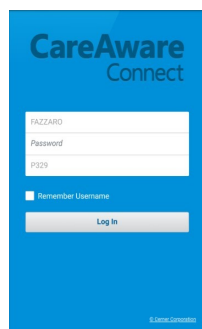

Lakewood Ranch Medical Center’s new Freestanding Emergency Department, ER at Fruitville, will begin operations on Tuesday, December 1. As a physician who takes ER call at the main hospital, you may also now receive a call from the FED.

For those that have not worked with an FED in past, it is treated as an extension of the Main Hospital ER. It is staffed 24/7 with an ER Physician and full complement of nursing, imaging, and laboratory. All EMTALA and federal/state regulations apply. If a specialist on-call is needed for a patient, the FED would call you, just as they would from the Main Hospital ER. If a patient needs to be physically examined by an on-call physician, the patient may be transferred to the Main Hospital ER or admitted directly from the FED. There are limited modalities at the FED for treatment, so any surgical intervention, advanced diagnostic testing (anything above a CT, X-ray, or Ultrasound), etc. will be performed at the Main Hospital.

CareAware Connect Messaging App

LWRMC is pleased to announce the Go Live date of September 14th for CareAware Connect. Connect Messaging is a mobile app solution that delivers secure messaging, voice and contacts directory via your personal smartphone. The technology will allow easy phone access directly to the nurse caring for your patients.

Download the Cerner CareAware Connect Messenger app from your phone’s app store. Call the Physician Support Desk (941-745-7575) for your one-time Access Code and to schedule an appointment for training.

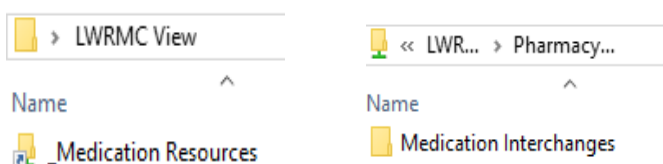

P&T Committee - Formulary Changes

Therapeutic Interchanges

UHS corporate performed a large clinical review of the entire automatic therapeutic interchange list used throughout all UHS hospitals and made recommendations to implement moving forward. In conjunction, LWRMC reviewed the proposed interchanges based on their equivalent therapeutic dosing efficacy, safety, adverse drug reactions and pricing. These changes were approved to update as presented.

- Updates to the LWRMC automatic Therapeutic Interchange Protocol (TIPS) can be found in the LWRMC view → _Medication Resources → Medication Interchanges

Formulary Deletions

- After a thorough review of the entire LWRMC formulary, many items were identified as suggested agents to be considered for removal from the formulary. LWRMC has alternate formulary items that may be considered for use in place of these agents. These medications were approved for formulary removal July 2020

Anagrelide 0.5mg capsule	Ethacrynate Sodium 50mg vial	Primaquine Phosphate 26.3mg tablet	Tetracycline 250mg capsule
Ascorbate Sodium 1000mg/2mL ampule	Hyaluronate Sodium 10mg/mL topical	Pyrimethamine 25mg tablet	Triamterene 50mg capsule
Chlorothiazide 500mg vial	Hydrocodone/Guaifenesin 2.5mg/200mg/5mL oral solution	Rifabutin 150mg capsule	Zileuton 600mg tablet
Ciprofloxacin 0.3% ophthalmic ointment	Leucovorin calcium (folinic acid) 10mg tablet and 100mg vial	Rimexolone 5ml ophthalmic suspension	
Demeclocycline 150mg tab	Methyldopa 250mg tablet	Selegiline 5mg tablet	

Policy and procedures

- Dobutamine Stress Echocardiogram
 - This policy was up for review and revised based on available evidence, standards and accreditation requirements.
 - The purpose of the policy is to establish procedural steps and promote safety during a dobutamine stress echocardiogram procedure.
- Regadenoson Nuclear Stress Test
 - This policy was up for review and revised to provide up-to-date guidelines and promote safety.
 - The purpose of the policy is to establish general guidelines and procedural steps for all LWRMC Registered Nurses (RN's) and medical staff participating in a Regadenoson Nuclear Stress Test.

“PM Collection”

The “PM Collection” is a great tool to use to ensure test results are complete and in the chart for the Early Discharge Patients. When placing a Lab Test Order for an “Early Discharge” patient, select “PM Collection” as the test priority.

- PM Collection is established as a TIMED collection in Cerner. Specimen collection will occur at 21:00
- PM Collection allows the phlebotomist to plan ahead for collection
- PM Collection improves collection workflow by removing the collection time from the volume of the AM collection run
- PM Collection helps ensure the results are in the patients chart when the physician rounds early the next morning

Patient’s Choice Awards

LWRMC began a new recognition program for our providers this year. Each quarter a provider will be chosen from the patient comments received for that time period. The comments are from our patient satisfaction surveys and discharge phone calls.

Congratulations to Dr. David Cashen for being our first provider chosen for the Patient’s Choice Award! During the first quarter of 2020, 67 different providers were recognized for a total of 188 compliments. Dr. David Cashen received the most patient compliments out of all the providers mentioned. Congratulations!!

Congratulations to Dr. Thomas Hendrix for being our 2nd quarter Patient’s Choice Award recipient! During this time period, 82 different providers were recognized for a total of 232 compliments. Dr. Hendrix received the most patient compliments out of all the providers mentioned. Congratulations!!

Expanded Interventional Radiology Services

Dr. Folayan Fatade joined the (LWRMC) team in July to assist in the expansion of Interventional Radiology services. Dr. Fatade attended medical school at The Ohio State University and Residency at Stony Brook University. He completed a Fellowship in Interventional Radiology at University of Maryland Medical Center and served as Chief of IR at St. Agnes Hospital in Baltimore before relocating to Florida. Dr. Fatade is Board Certified by the American Board of Radiology in Vascular and Interventional Radiology, as well as Diagnostic Radiology.

Medical Staff Policy Changes

NEW

- Emergency Room – Identification and Management of Patients at Risk for Suicide

LWRMC Welcomes New COO, Diego Perilla

Join us in welcoming our new COO, Diego Perilla, FACHE, MBA, MPH, MPA, to LWRMC! Diego has been the Associate Administrator at our sister UHS hospital, Wellington Regional Medical Center since January 2019. He has previous experience at Cleveland Clinic and the University of Miami Health System. He received his Bachelor and Master degrees from the University of Miami and has attained Fellow status with the American College of Healthcare Executives. His previous experience in hospital administration, project management, and Lean Six Sigma certification will be great assets for Lakewood Ranch.
